

# LudiSec

Platform Blueprint

## What is LudiSec?

LudiSec is a next-generation cybersecurity risk management platform that replaces dull compliance lectures with engaging, behavioral-science-driven training. By combining proven psychology with enterprise-grade security practices, LudiSec turns everyday employees into an active, threat-aware line of defense.

## What Makes It Different?

LudiSec transforms standard compliance training into an engaging, reward-driven experience. By replacing passive content with an active gamification engine, the platform significantly improves learning retention — motivating employees to stay alert, recognise phishing attempts, and actively help protect the organisation from real threats.

## The Player Journey

### LEARN

Absorb bite-sized learning paths and dynamic quizzes designed to build a strong security knowledge baseline.

### PRACTICE

Put knowledge into action inside high-stakes Digital Escape Rooms and earn recognised Mastery Badges.

### SPOT

Report live anomalies to earn instant rewards, with top contributions recognised through the Verification programme.

### THE MISSION

Build a workforce that doesn't just complete training — one that stays vigilant, recognises threats early, and actively contributes to the organisation's security posture every day.

✓ **STAY VIGILANT**

### PROJECT STATUS

LudiSec is currently in active development. Core platform features, gamification mechanics, and learning content are being built and refined ahead of upcoming releases.
